## CURRENT INTERNET SUBSCRIBER.

### Internet Packaging and Pricing Changes

The joint utility project to install fiber optic cables from Frazier Park to Pine Mountain Club has been plagued by Forest Service stoppages. At present, there is no firm completion date but hopefully it will be completed this year. In the meantime, CalNeva has completed another upgrade to its Internet circuit and its data traffic processing electronics, enabling CalNeva to handle ever increasing traffic while providing higher speeds and higher traffic allowances. The changes detailed below take effect on May 1<sup>st</sup> and will result in a simplifying of the offerings and the addition of multiple unlimited usage packages. All subscribers will experience higher speeds and monthly traffic allowances while some will receive a reduction in price as well. The changes will also reduce or eliminate irritating over usage fees.
